

## My Family Health History

### Update My Family History

On this screen you can:

- Change your information or a family member's information by clicking (Update History) next to the name in the list.
- Add information for a family member by clicking (Add History) next to the name in the list.
- Add another family member to your history by clicking "Add Another Family Member."
- Remove a family member from your history by clicking (Remove) next to the name in the list. (You cannot remove yourself, your parents, or grandparents.)

If you are finished filling out your family health history, click "Save Family History." Then you can view a drawing or chart of your family tree by clicking "View Diagram and Chart." You can also copy this for a family member by clicking "Copy for Family Member" at the top of this page.

2. Manage Your Information

Now that you've saved your Family Health History, you can -

#### Print Chart

You can print your family health portrait in a diagram and chart form to share with your healthcare worker. Talking with your health care worker about your family health history can help you stay healthy.

Print Chart

#### Copy My Family Health History for Another Family Member

You may make any relative be the center person of the Family Health History. This person can then add relatives from their families to create a new family health history without having to start from the very beginning.
