

# My Family Health Portrait

A tool from the Surgeon General

Using *My Family Health Portrait* you can:

- Enter your family health history.
- Print your family health history to share with family or your health care worker.
- Save your family health history so you can update it over time.

Talking with your health care worker about your family health history can help you stay healthy!

### Open from Computer

In this step, you can open your Family Health History from a previously-saved XML data file on your computer or portable storage device.

Use the Browse... button to select a file on your computer, then press "Open from Computer" to open it.

Browse...

Open from Computer

### Open from Microsoft HealthVault®

Microsoft HealthVault® allows you to store health information from many sources in one location, so it's always organized and available to you online. Family health history information in HealthVault, either previously saved from this web site or created within HealthVault, can be opened for viewing and editing here.

### Update My Family History

On this screen you can:

- Change your information or a family member's information by clicking (Update History) next to the name in the list.
- Add information for a family member by clicking (Add History) next to the name in the list.
- Add another family member to your history by clicking "Add Another Family Member."
- Remove a family member from your history by clicking (Remove) next to the name in the list. (You cannot remove yourself, your parents, or grandparents.)

If you are finished filling out your family health history, click "Save Family History." Then you can view a drawing or chart of your family tree by clicking "View Diagram and Chart." You can also copy this for a family member by clicking "Copy for Family Member" at the top of this page.
